Professional Experience

CharacterStrong

December 2021 - Present || Seattle, WA (Remote)

Front End Developer

- Responsible for portions of the initial building process and continued dev ownership, post-launch, of CharacterStrong's primary website with an emphasis on front-end functionality and styling.
- Expeditious implementation of all engineering and web presence requests from the CharacterStrong team as well as customer suggestions, invariably maintaining uniquely elevated, customer-facing web app visual standards which meet ADA and WCAG compliance guidelines.
- Efficient communication and collaboration with a tightly-knit technology and development team, consistently delivering swift solutions while ardently conserving best coding practices including scalability, accessibility, readability and overall organization.
- Adept, daily incorporation of HTML, SASS/SCSS, JavaScript, React, jQuery, PHP, Tailwind CSS and Git as well as the WordPress CMS.
- Frequent, expert-level utilization of such applications as Visual Studio Code, Figma, Pixelmator and Final Cut Pro.
- Consistent incorporation of a myriad of systems for various integration purposes including Calendly, Cloudflare, Formstack, InfusionSoft, Kinsta, Leadpages, Notion and Zapier.
- Most importantly, enthusiastic commitment to CharacterStrong's core company values of kindness, patience, honesty, respect, selflessness, forgiveness and humility in the workplace - as well as in day-to-day life - while always observing CharacterStrong's overarching mission of doing our part to create a more loving world.

Prime Digital Academy

July 2021 - November 2021 || Minneapolis, MN

Software Engineering Student

- SOLO PROJECT: "Magic Beans Cryptofolio Tracker"

Magic Beans, an app that was named without hesitation by my eight-year-old stepson, is a full-stack, feature-rich, styled-for-mobile application that allows a user to access and track an expanse of real-time cryptocurrency market data and build and maintain their own highly interactive portfolio of crypto assets.

- Comprehensive organization of data in a myriad of forms including current price, price history, market capitalization, volume, 24-hour percentage price change, fully-diluted valuation, circulating supply, sparkline, various currency conversions, and links to relevant websites, social media and forums.
- Responsible for the implementation of all aspects of all relevant technologies - PostgreSQL, Express, Node, Redux, Sagas, Javascript and React.
- Strong emphasis on visualizations via an adept approach to Material UI and expert CSS styling as well as in-line styling, original artwork, Chart.js, logos and animations designed from scratch.

• CLIENT PROJECT: “Minnesota Marketing Careers”

Minnesota Marketing Careers specializes in gathering and maintaining lists of exciting new local, remote and internship opportunities and sharing them out to organized, categorized email lists for job-seekers as well as maintaining admin and user submissions in a web portal.

- Meticulous, team-oriented organization of a substantial database structure including user and admin-submitted career opportunities as well as displays on multiple pages within a feature-rich, three-tiered application for desktop and mobile.
- Full functionality for three primary user groups - job-seekers, employers and application administrators (Minnesota Marketing Careers staff themselves).
- Responsible for the implementation of all aspects of all relevant technologies - PostgreSQL, Express, Node, Redux, Sagas, Javascript React and all aspects of campaign and template creation and manipulation via the robust features of the Mailchimp API.
- Strong emphasis on visualization and styling with Material UI, MUI Makestyles, Styled Components and CSS including media queries for full responsiveness across all applicable devices.

• EDUCATIONAL REPOSITORY: “Tutorials Galore”

Tutorials Galore is a full-stack, ground-up learning/teaching project and GitHub repository that is ever-evolving as a series of tutorials for Prime Digital Academy students as well as general learners of the tech stack.

- Built on an entirely voluntary basis to assist Prime Digital Academy students and enthusiasts alike on their software development journey.
- Features comprehensive curriculum-like MARKDOWN/README files with screen captures, application GIFs, code blocks, and introductory walkthroughs of jQuery, Redux Sagas, React Router, Material UI and more.

Web and Graphic Design

2006 - Present || Minneapolis, MN

Freelance

- Over 15 years of exemplary web design services as well as business and personal graphic design, logo design, video editing and animation services effectively earning the trust of various clients across the midwest.
- Self-taught, proficient command over HTML, Flash animation, MOHO design, editing services as well as various aspects of web styling including Material UI and from-scratch CSS and professional web and other implementation of all aforementioned.
- Several years of client satisfaction via dependable and timely project delivery with adept utilization of such design applications as Visual Studio Code, Anime Studio Pro, Pixelmator Pro, Logic Pro X, Final Cut Pro, SWiSH Max and more.

Zivix

May 2014 - July 2021 || Minneapolis, MN

Customer Experience Specialist
Inventory Management / QA

- Ensured complete and consistent customer satisfaction via support channels while meeting fast-paced customer service delivery standards.
- National travel for the purpose of demoing tech products at various tech headquarters such as Apple, Best Buy and b8ta.
- Sustained in-house inventory measures to ensure uninterrupted and smooth operation of product sales channels internationally as well as with in-store and online retailers such as Amazon, Apple, Shopify and Reverb.
- Utilized home office and extensive remote resources to deliver equally prompt international customer service, sales channel and inventory upkeep and technical QA and testing while office and facilities were inaccessible throughout most of 2020.
- Skilled utilization of Zendesk, Zendesk Chat, Notion, Trello, GitHub, Slack, and every iOS and Android device released since 2012.

Junk FM

May 2010 - Present || Minneapolis, MN

Performer, Partner, Owner

- Compile market intelligence and conceptualize strategies to develop a business plan and coordinate aspects of operations and growth of a successful, fast-paced brand.
- Coordinate the logistics for a team of between four and ten people and equipment for approximately 120 shows annually throughout The United States, Europe and the Middle East.
- Manage relationships with internal and external stakeholders to encourage long-term brand loyalty and enthusiasm.
- Apply a consultative approach with a high level of attention to detail in order to identify client needs as well as provide recommendations that effectively create win-win situations.
- Bring a fast-paced, high-energy approach to each performance and interact with clients and vendors to create excitement while adhering to yet pushing the limits of brand standards in order to build exceptional engagement.
